

# SOFFITS

## FLEXLOC®

Available in 8½-inch, 9½-inch or 10½-inch widths, the FlexLoc® panel is clipped down to a waterproofed solid substrate, when used in roof applications.

### Features and Benefits:

- Because the panels are generally run parallel to the curved surface, no pre-curved of the FlexLoc® panel is required.
- For the designer who wants a barrel vault with a smooth look (no standing seams) and horizontal lines instead of vertical, curved FlexLoc® is the recommended product. It's ideal for curved applications or soffits.
- FlexLoc® is a non-structural panel.

### Product Specifications

- **Applications:** Roof, Fascia, Soffit
- **Coverage Widths:** 8½", 9½", 10½"
